COMPANY PROFILE

Thermodyne Bakery & Industrial Equipments Pvt. Ltd (new name incorporated on 19.12.2011) started its business operations in the year **2010** in the name of **See Yes Thermodyne Private Limited**, with the objective of manufacturing and supplying a wide variety of Quality Baking Ovens and equipments both for domestic and commercial clients. For perfect baking the air and heat has to be all pervasive, balanced and uniform. We take all the features into considerations while selecting the technology and apply the same to suit different models and range of ovens.

We leverage on cutting edge Research and Development to prepare the prototype. Our clients are exposed to the best. It is therefore our earnest endeavor to offer them such products that would fulfill all their expectations. We are considered the pioneers of rotary rack ovens and equipments in the country. The ovens manufactured by us are energy efficient with right kind of insulation cover for balanced distribution of heat. Ovens manufactured by us, operate on electricity, gas and light oil. These ovens are great for bulk as well as smaller quantities. Realizing that a standard model may not address the requirements of varied requirements of clients, we offer to customize our range to offer critical solutions to meet their specific requirements.

Our core expertise is the heating and cooling process in the bakery industry and other industrial equipments as efficient process design, and that is what we concentrate on.

Our product portfolio is focused on baking ovens (standard models as well as custom built), Customized industrial ovens, Humidity chambers, cooling chambers and bakery & industrial equipments. We are supplying our equipments to domestic market all over India and exporting to Bangladesh, Middle East countries and exploring market in African countries.

The name Thermodyne is associated with many new advances in the world of baking, curing, and drying applications.
